The International Passive House Days will take place on 06 - 08.11.2009. This initiative is to open as much as possible existing Passive House buildings on a certain day to the public. The residents invite interested persons to visit their homes and tell them about their experiences about living in a Passive House. (see [Austria](#) [Belgium](#) [Croatia](#) [Germany](#) [Sweden](#)),

The project *Establishment of a Co-operation Network of Passive House Promoters-PASS-NET* aims at the promotion and diffusion of the passive house standard and very low energy building technologies in Europe, including a focus on new member states.

Within the framework of the IEE Programme some promotional activities have already been set up for northern and southern Member States.

This project will bring together Member States with significant success in promoting the passive house standard, with Member States with limited experience, esp. from Central and Eastern Europe to learn from each other and to take joint action.
