

SC ISPE SA is a company specialized in technical, financial and institutional consulting, project management, studies, research and development, basic and detail design/engineering services in the following fields: power (electricity and heat generation, transmission and distribution), environmental protection, industry, civil and industrial works, public services, infrastructure systems including land reclamation.

ISPE is concerned to minimize the environmental impact, improve the image of the company as regards the environmental performance it achieved and to promote a continuous open dialogue with the clients, the authorities, residents, non-governmental organizations and other parties interested.

The top management of the company decided to maintain and continually improve the Environmental Management System according to the requirements of the standard ISO 14001:2015 as component of the Integrated Management System - Quality, Environment, Occupational Health Safety and Information Security.

The general environmental targets of ISPE are the following:

1. The continual improvement of the global environmental performance, waste management improving and human, economic and natural resources efficient use,
2. To inform, educate, make aware, train, motivate, the employees in order to develop the corporate environment culture and to promote these principles to the interested parties,
3. The maintenance and continual improvement of the effectiveness and efficiency of the Environmental Management System, as part of the Integrated Management System.
4. Identify, assess and manage risks and opportunities for achieving the objectives.

In order to put into practice these targets, as Chief Executive Officer I commit myself to:

- Continuously promote pollution prevention and resource protection actions;
- Ensure the observance of legal requirements and of other environmental requirements to which the company subscribes;
- Stimulate the continuous improvement of the Environmental Management System;
- Provide all the necessary resources - human, infrastructure, working environment, material, financial - for the operation of the Environmental Management System.

This responsible environmental policy applying is a priority of the top and executive management which ensure permanently that this policy is understood, observed, and supported both by its own employees, at each hierarchical level, and by the personnel working for and on behalf of ISPE.

This declaration is communicated to all the employees and periodically analyzed for its continuous updating.

Chief Executive Officer,
eng. Ion Eduard Chițescu
